# Visual Security Approach

At Visual Security our approach is simple in ensuring all recognised risks have been managed with the appropriate controls to maintaining an injury free workplace.

Once a scope has been outlined a Risk Assessment is conducted with a full overview of the services provided. Our internal management plans to assessing risk will provide our guards with the necessary support documents to react and respond with the necessary actions when required.

All Visual Security Procedures will be in line with your current operating business models, which will come under the hierarchy of documents in the flow chart displayed below.

Hierarchy of Documents:

Security Management Plan:
The Security Management Plan (SMP) documents the resources and strategies to address an immediate response to security related incidents. It is primarily concerned with the protection and preservation of life, the environment and property.

The SMP is supported by general information regarding plan administration and the day-to-day running of Visual Security services on site that cover:

- Visual Security Policies;
- Visual Security Standard Operating Procedures;
- Visual Security Standard Work Instructions.

Objectives and Priorities:

The Security Management Plan (SMP) can be site specific risk based. The objectives of the plan are to support Visual Security Operators with leading actions and interventions that may be required to provide an effective initial response and resolutions for security related incidents.

This SMP will document the resources and strategies (based on risk scenarios) to address the immediate response to a security incident. The top priority for this plan is for the protection and preservation of life, the environment and assets. The SMP will be an effective mechanism for escalating an incident to a client business management level when necessary, once our capability structures are superseded.

Accountabilities:

Visual Security Team is accountable for security service provided for all clients and business.
